
***A brave new world for
Health and Safety***

Using ISO 45001 to engage and
safeguard your workforce

What is ISO 45001?

ISO 45001 is a brand new international standard for Occupational Health and Safety management systems.

It harmonises the framework for OH&S risk management across the world, providing a single benchmark for OH&S performance.

The purpose of ISO 45001 is to provide a framework for managing the prevention of death, work-related injury and ill health, both for workers and for persons under the organisation's control.

Why do we need it?

An organisation's activities can pose a health and safety risk, therefore it is critically important for the organisation to eliminate or minimise OH&S risks by taking appropriate preventive measures. When these measures are applied by the organisation through its OH&S management system, and supported by the use of appropriate controls, methods and tools, they improve its OH&S performance.

It can be more effective and efficient to take early action to address potential opportunities for improvement of OH&S performance.

What value will ISO 45001 add to a business?

An organisation is responsible for the health and safety of its workers and that of other persons under its control who are performing work on its behalf, including promoting and protecting their physical and mental health.

The adoption of an occupational health and safety management system is intended to enable an organisation to improve its OH&S performance in the enhancement of health and safety at work and to manage its OH&S risks.

EM

OH&S Management Systems Lead Auditor

4.5 days

\$2,895 incl gst

Combining OH&S Management Systems course with our Becoming a Skilled Lead Auditor course will leave participants not only with the knowledge of AS/NZS 4801:2001 and ISO 45001, but also the knowledge and skills to be able to conduct effective management systems audits.

OH&S Management Systems

2.5 days

\$1,895 incl gst

Designed to meet the requirements of the current AS/NZS 4801:2001, whilst also preparing you for ISO 45001, our OH&S management systems course will teach you a practical, risk-based approach to health and safety management systems.

Learn the application of Hazard Identification, Risk Assessment and Control in a modern organisational context, and learn how to assure the quality of your OH&S system.

Becoming A Skilled Lead Auditor

2 days

\$1,445 incl gst

This course focuses on the principles of auditing, the importance of planning, the roles and responsibilities of an auditor, how to gather effective audit evidence and report on the audit findings, and the required follow-up activities as an auditor. Designed to cater for an audit of any management system, this audit course will leave you with the skills needed in the modern workplace. This course forms the first 2 days of the Integrated Management Systems Lead Auditor course, but may be attended separately.

All of our courses are internationally recognised by Exemplar Global.

“In over 35 years of internal and external training, I can say that the course delivery is the best I have experienced. Everything else pales into insignificance. They are totally switched onto the marketplace, and the training is brilliantly presented.”

-Julie Fawcett

Additional Training

Quality

ISO 9001 helps organisations take a risk-based approach to ensuring customer needs and expectations are met.

It provides customers with the confidence that they will receive what they order.

Environmental

ISO 14001 helps organisations to better manage their environmental aspects and associated impacts, be they local, national, or international.

It provides organisations with a framework to protect the environment and respond to changing conditions.

Quality and OH&S competencies are combined with Environment to form our Integrated Management Systems course.

Information Security

ISO 27001:2013 is a well-respected international information security standard that outlines the key processes and approaches a business needs to manage information security risk in a practical way.

It provides appropriate safeguards around information and technology enabled business assets.

Why choose PwC's training?

No homework or post-course assessment

We never cancel courses

You receive a complimentary licensed copy of ISO 9001:2015, ISO 14001:2015, ISO 45001:2018

Training is delivered by practising audit professionals

Internationally recognised qualifications

Certificates are issued promptly upon the completion of the course

All learning materials and refreshments are provided

Training offered in-house or public

The course has been of the most informative and interactive course I've participated in which made retaining information easier.

- Tegan Alexander

The rates of accidents, injuries, deaths and illnesses to people through their work activities continue to be at an unacceptable level. While this directly affects the individuals that are harmed, it also has consequences for their organisations and the societies within which they live.
